Extended Labor Market

Join companies like Hewlett-Packard and Microsoft when you locate your data center or critical mission operation in Virginia's Growth Alliance region.

We're a Certified Work Ready Region.

*"Where high capacity and low costs come together, you'll find infinite possibilities."*

Tad Deriso, President & CEO  
Mid-Atlantic Broadband

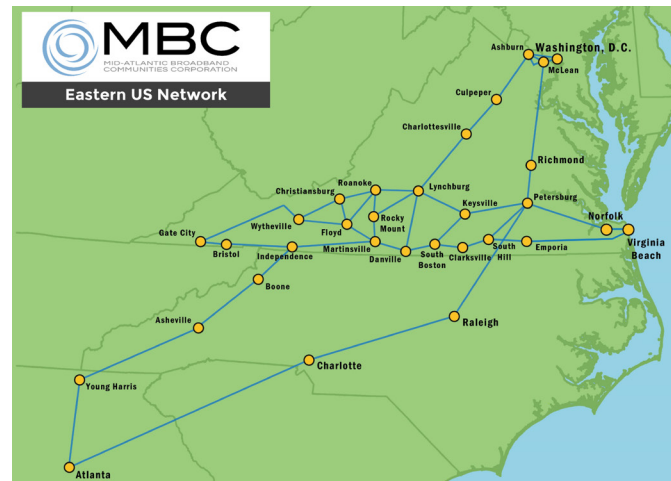

**Open-access data transport** lets you connect to the world using your choice of provider.

**400** Gbps low latency backbone  
Connects to key Tier 1 peering points in Northern Virginia & the Southeast.

Strategically located near DC and Hampton Roads but outside of the blast zone.

Our long-haul fiber network enables optical transport to key peering hubs, carrier neutral data centers, and carrier interconnection points.

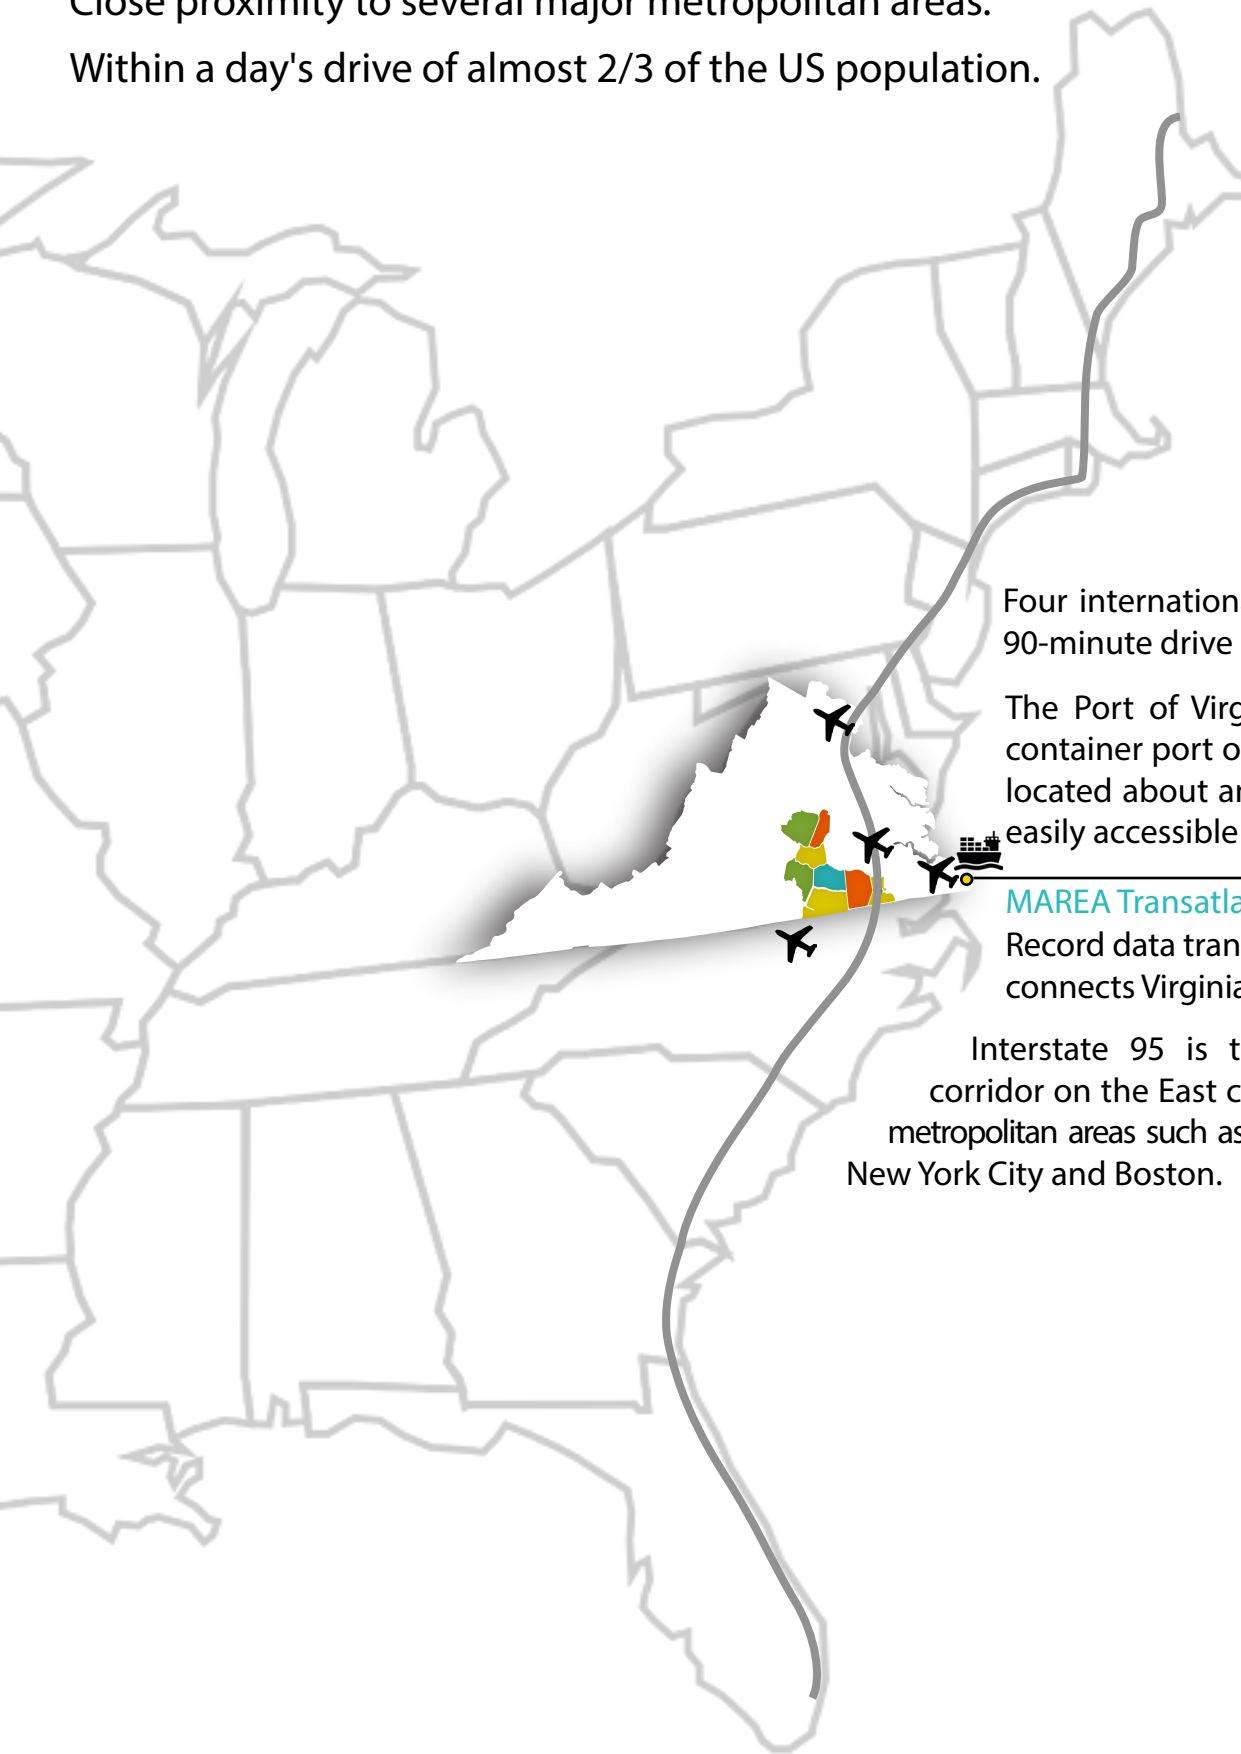

**4**  
Terabits of transport capacity

# Virginia's Growth Alliance is centrally positioned along the eastern seaboard of the United States.

Close proximity to several major metropolitan areas.

Within a day's drive of almost 2/3 of the US population.

Four international airports are within a 90-minute drive of VGA.

The Port of Virginia is the 3rd largest container port on the US East Coast. It's located about an hour East of VGA and easily accessible via road or rail.

**MAREA Transatlantic Subsea Cable**  
Record data transfer speed of 26.2 Tbps, connects Virginia Beach to Bilbao, Spain.

Interstate 95 is the major north-south corridor on the East coast, connecting major metropolitan areas such as Miami, Washington D.C., New York City and Boston.
